

Sprint Backlog, Iteration #3					
User Story	Task	Member responsible for the task	Task Assigned To	Estimated Effort per Task (points)	Priority(A - C)
Visualizer: the component that is responsible for creating the visualizations.	Visualizer should be able to create a visualization of the results from different ASATs.	Tim Buckers	Boning Gong, Tim Buckers	6	A
	Menu to enable and disable ASAT's and warning categories	Tim Buckers	Tim Buckers	7	B
	Visualization of class structure (inheritance and dependencies)	Boning Gong	Boning Gong	7	A
User Interface: the user interface of the system.	Basic user interface of the system	Clinton Cao	Sunwei Wang, Clinton Cao	5	B
	Interface should have the option to let the user selects his/her project for analysis.	Clinton Cao	Sunwei Wang, Clinton Cao	2	B
Categorizing the warnings: same kinds of warnings should be put into the same category.	Write a class that can map a warning to the right category (using General Defect Classification).	Sunwei Wang	Sunwei Wang, Clinton Cao	2	A
Documentation: update documents based on changes or feedback.	Update the architecture design document if the architecture of the system has changed.	Michiel Doesburg	Michiel Doesburg	1	C
Analyzer: the component that is responsible for analyzing the project that is given as input.	Finish the implementation that the analyzer can run CheckStyle on the whole project instead of one file.	Michiel Doesburg	Michiel Doesburg	4	A
	Finish the implementation that the analyzer can run PMD on the whole project instead of one file.	Michiel Doesburg	Michiel Doesburg	4	A
	Implement the following feature: the analyzer should be able to run Cobertura and FindBugs.	Michiel Doesburg	Michiel Doesburg, Clinton Cao, Sunwei Wang	4	B
Team member:	Total estimated amount of points:				
Boning Gong	13				
Tim Buckers	13				
Sunwei Wang	13				
Clinton Cao	13				
Michiel Doesburg	13				
Context Project:	TSE				
Group:	BlueTurtle
